

The City of Dayton Department of Water is creating an inventory of service lines in order to identify where lead pipes may still exist in the city.

City of Dayton Department of Water

Service Line Compliance Program

We visited your property today and found that your service line is made of:

Lead

Copper

Galvanized Steel

Plastic

If your service line is lead, we have dropped off a free water filter pitcher for your use.

Make sure to follow the manufacturer's instructions on how to properly use the pitcher, including when to replace the filter.

We also highly recommend contacting a plumber to replace your service line with copper or plastic. For the latest list of certified plumbers, please visit:

daytonohio.gov/691/Registered-Contractors-Lists

If you have questions, please contact (937) 333-3725 or SLCP@daytonohio.gov.
